INSTRUCTIONS

General: This form is designed for submitting a complete and correct well completion report and log on all types of lands and leases to either a Federal agency or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office. See instructions on items 22 and 24, and 33, below regarding separate reports for separate completions.

If not filed prior to the time this summary record is submitted, copies of all currently available logs (drillers, geologists, sample and core analysis, all types electric, etc.), formation and pressure tests, and directional surveys, should be attached hereto, to the extent required by applicable Federal and/or State laws and regulations. All attachments should be listed on this form, see item 35.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 18: Indicate which elevation is used as reference (where not otherwise shown) for depth measurements given in other spaces on this form and in any attachments. **Items 22 and 24:** If this well is completed for separate production from more than one interval zone (multiple completion), so state in item 22, and in item 24 show the producing interval, or intervals, top(s), bottom(s) and name(s) (if any) for only the interval reported in item 33. Submit a separate report (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 29: "Sacks Cement": Attached supplemental records for this well should show the details of any multiple stage cementing and the location of the cementing tool. **Item 33:** Submit a separate completion report on this form for each interval to be separately produced. (See instruction for items 22 and 24 above.)

37. SUMMARY OF POROUS ZONES: SHOW ALL IMPORTANT ZONES OF POROSITY AND CONTENTS THEREOF: CORED INTERVALS; AND ALL DRILL-STEM TESTS, INCLUDING DEPTH INTERVAL TESTED, CURSION USED, TIME TOOL OPEN, FLOWING AND SHUT-IN PRESSURES, AND RECOVERIES			38. GEOLOGIC MARKERS

RE: Well No. State Of Utah #8-2-15-22,
Sec. 2, T. 15S, R. 22E,
Uintah County, Utah

Insofar as this office is concerned, approval to drill the above referred to gas well is hereby granted ~~conditionally~~ upon the Bottom Canyon Unit being approved within a ~~reasonable~~ amount of time.

Should you determine that it will be necessary to plug and abandon this well, you are hereby requested to immediately notify the following:

CLEON B. FEIGHT - Director
Office: 533-5771
Home: 466-4455

Enclosed please find Form OGC-8-X, which is to be completed whether or not water sands (aquifers) are encountered during drilling. Your cooperation in completing this form will be appreciated.

Further, it is requested that this Division be notified within 24 hours after drilling operations commence, and that the drilling contractor and rig number be identified.

The API number assigned to this well is 43-047-31135.

Sincerely,

DIVISION OF OIL, GAS AND MINING

Uintah County, Utah

Gentlemen:

According to our records, a "Well Completion Report" filed with this office February 15, 1982, October 6, 1981, & March 17, 1982, from above referred to wells, indicates the following electric logs were run: #13-26-14-22- CNL-FDC, CBL, VDL, CCL, GR; #8-2-15-22- DIL, FDC-CNL-GR, CBL-VDL-GR; #14-15-15-24- CBL-VDL, DIL-GR, FDC-CNL-GR, BHC-CAL-GR, Cyberlook, HDY-GR, FIL-GR. As of todays date, this office has not received these logs: #13-26-14-22- CBL, VDL, CCL; #8-2-15-22- CBL-VDL-GR; #14-15-15-24- CBL-VDL, Cyberlook, HDY-GR.

Rule C-5, General Rules and Regulations and Rules of Practice and Procedure, requires that a well log shall be filed with the Commission together with a copy of the electric and radioactivity logs.

Your prompt attention to the above will be greatly appreciated.

Sincerely,

DIVISION OF OIL, GAS AND MINING

COSEKA RESOURCES (U.S.A.) LIMITED

300 WRITER SQUARE, 1512 LARIMER STREET, DENVER, COLORADO 80202-1602 (303) 573-6178

RECEIVED
JUL 1 1988

DIVISION OF
OIL, GAS & MINING

June 27, 1988

On June 30, 1988, Coseka Resources (U.S.A.) Limited will be merged with and change its name to Arch Oil & Gas Company. The address for the organization will be unchanged at 300 Writer Square Building, 1512 Larimer, Suite 300, Denver, Colorado 80202-1602. The telephone number will also remain the same at (303) 573-6178.

While there should be no change in your communications with us, it is our hope that this change in name reflects the resolution of the past bankruptcy and the new and positive direction for the company. We look forward to working with you in the future as Arch Oil & Gas Company.

Thank you for your interest and if you have any questions, please contact us.

Sincerely,

Coseka Resources (U.S.A.) Limited

13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Response to State of Utah letter dated 2/19/99: SI/TA Well Compliance Review. Subject well is currently shut-in waiting for pipeline connection and improved gas marketing conditions. Last IP test was 283 MCFD. BFC requests an extension of the current well status until gas market conditions improve. BFC offers the following explanation and supporting data to show the well has mechanical integrity: 1) Base of "Moderately Saline Ground Water" is approximately 718' (Tech Pub 92--State of Utah, Dept of Natural Resources). This water is protected by Surface Casing (9-5/8" @ 311' w/ 225 Sx Cement), and Production Casing (4-1/2" @ 5938' w/ 555 Sx Cement) 2) Surface equipment has been inspected and is in sound working condition with no detectable leaks. 3) Offset wells have exhibited no visible corrosion in downhole equipment when pulled. 4) Wellhead pressure is 1100 psig and has been stable, indicating no underground leakage. BFC hereby states that the well is not a risk to public health and safety or to the environment and respectfully requests an extension of the current well status.

14. I hereby certify that the foregoing is true and correct.

13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Bonneville Fuels proposes to install approximately 3.07 miles of 2" polypipe gas line to connect the above referenced well to the Wildhorse Energy gas gathering system. The proposed pipeline is on State and BLM land, and will be installed on the surface of the ground. The pipeline will follow existing access roads and will be installed within 25' of the road. The operating pressure of the gathering system in this area is currently 110-130 psi. A maximum operating pressure of 180 psi is expected. The pipeline will be pressure tested to 200 psi. A natural gas orifice meter will be installed where the pipeline connects to the Wildhorse Energy gathering system. The proposed gas meter is off lease on BLM land and in the NW/NE/NE 4 of Sec. 25 T14S R22E.

Pipeline Specifications: Poly Pipe PE 3408 Resin, SDR-7 pipe. Minimum wall thickness = .339"

Pressure rating: 265 psi @ 73 Deg F; 235 psi @ 100 Deg. F; 191 psi @ 120 Deg. F.

The pressure given for PE 3408 material contain a 1.8 to 1 safety margin.

14. I hereby certify that the foregoing is true and correct.

* Must be accompanied by a cement verification report.

13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Bonneville Fuels requests permission to recomplete the subject well to the Castlegate formation. The well is currently completed in the Mancos formation from 5228'-5398' KB. A flow test from this interval determined the well to be uneconomic. Bonneville proposes abandoning the existing interval by setting a CIBP @ 5100' KB and dumping 2 sks cement on top. The Castlegate would then be perforated from 4371' - 4381' KB, 2 JSPF, 20 holes and acidized if necessary to establish commercial production.

14. I hereby certify that the foregoing is true and correct.

NOTICE

Carbon Energy Corporation (USA)	:	Oil and Gas Leases
1700 Broadway, Suite 1150	:	
Denver, Colorado 80290	:	

Name Change Recognized

Acceptable evidence has been received in this office concerning the name change of Bonneville Fuels Corporation to Carbon Energy Corporation (USA) on Federal oil and gas leases. For our purposes, the name change is recognized effective July 11, 2002, the date of acceptance by the Secretary of State of Colorado.

The oil and gas lease files identified on the enclosed exhibit have been noted as to the name change. The exhibit was compiled from a list of leases obtained from our automated records system. We have not abstracted the lease files to determine if the entity affected by the name change holds an interest in the leases identified nor have we attempted to identify leases where the entity is the operator on the ground maintaining no vested record title or operating rights interests. We are notifying the Minerals Management Service and all applicable Bureau of Land Management offices of the name change by a copy of this notice. If additional documentation for changes of operator are required by our Field Offices, you will be contacted by them.

Due to the name change, the name of the principal on the statewide oil and gas bonds BLM Bond Nos. CO0743, MT1085, NM1755, and UT0604 automatically changed by operation of law from Bonneville Fuels Corporation to Carbon Energy Corporation (USA).

If you identify additional leases affected by the name change, please contact this office and we will document the files under our jurisdiction with a copy of this notice. If the leases are under the jurisdiction of another State Office, we will notify them.

Carbon Energy Corporation
Carbon Energy Corporation (USA)
CEC Resources Ltd.

8/30/02

State of Utah
Attn: Jim Thompson
Department of Natural Resources
Division of Oil Gas & Mining.
P. O. Box 145801
Salt Lake City, UT 84114-5801

Re: Corporate Name Change

Dear Mr Thompson

Enclosed find Sundry (Form 9) with a list of wells for the corporate name change reflecting Carbon Energy Corporation (USA) replacing Bonneville Fuels Corporation, and a revised "Annual Waste Management Plan for Calendar Year 2002"

The Department of Commerce gave me the file number for the approved "Amending Authority to Conduct Affairs or Registration" file # 974912-0143.

The Utah state bonds are under # CD 1101292002 and CD 1101743005.

If you require any further information about our name change, please contact me at the number below.

Sincerely,

Doris Maly
Engineering Technician

Encl. 2

Re: Extended Shut-in and Temporary Abandoned Well Requirements for Fee or State Leases.

Dear Mr. Carlton:

Evergreen Operating Corporation, as of March 2004, has two (2) State Lease Wells (see attachment A) that are currently in non-compliance for extended shut-in or temporary abandonment status. Wells SI/TA beyond twelve (12) consecutive months requires filing a Sundry Notice (R649-3-36-1). Wells with five (5) years non-activity or non-productivity shall be plugged, unless the Division grants approval for extended shut-in time upon a showing of good cause by the operator (R649-3-36-1.3.3). For extended SI/TA consideration the operator shall provide the Utah Division of Oil, Gas & Mining with the following:

1. Reasons for SI/TA of the well (R649-3-36-1.1).
2. The length of time the well is expected to be SI/TA (R649-3-36-1.2), and
3. An explanation and supporting data if necessary, for showing the well has integrity, meaning that the casing, cement, equipment condition, static fluid level, pressure, existence or absence of Underground Sources of Drinking Water and other factors do not make the well a risk to public health and safety or the environment (R649-3-36-1.3).

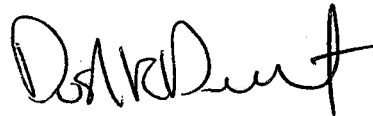

Page 2
Dennis Carlton
March 19, 2004

Submitting the information suggested below may help show well integrity and may help qualify your well for extended SI/TA. **Note: As of July 1, 2003, wells in violation of the SI/TA rule R649-3-36 may be subject to full cost bonding (R649-3-1-4.2, 4.3).**

1. Wellbore diagram, and
2. Copy of recent casing pressure test, and
3. Current pressures on the wellbore (tubing pressure, casing pressure, and casing/casing annuli pressure) showing wellbore has integrity, and
4. Fluid level in the wellbore, and
5. An explanation of how the submitted information proves integrity.

If the required information is not received within 30 days of the date of this notice, further actions may be initiated. If you have any questions concerning this matter, please contact me at (801) 538-5281.

Sincerely,

Dustin K. Doucet
Petroleum Engineer

13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Evergreen Operating Corporation intends on flow testing the Mancos Formation to determine if the well is capable of producing gas in commercial quantities. If it is determined there is commercial production Evergreen plans on building tank/battery facilities and laying pipeline (ROW Grant # UTU-77717) to hook this well up. If the Mancos is non-productive it is our intent to move up hole and test the Castlegate Formation from 4370' - 4382. Again, the same applies to the Castlegate. If productive the well will be hooked up to produce. If not the well will be plugged and abandoned.

If the well is not plugged and abandoned a casing mechanical integrity test will be performed.

Denver, Colorado 80202

Re: Extended Shut-in and Temporary Abandoned Well Requirements for Fee or State Leases dated March 19, 2004.

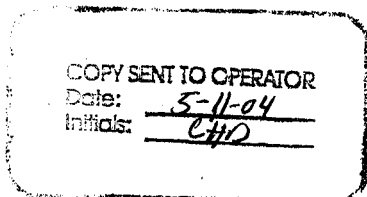

Dear Mr. McDonald,

The Division of Oil, Gas and Mining (DOGM) is in receipt of your two (2) sundries dated April 6, 2004 (received by the division on 4/07/2004) in regards to the two (2) shut-in wells operated by Evergreen Operating Corporation (Evergreen). It is the Divisions understanding Evergreen intends to plug the State 11-2-15-22 this year and requires additional time to evaluate State 8-2-15-22 for potential in the Mancos Shale and shallower formations. Based upon the submitted information and plan of action for the State 8-2-15-22 the DOGM grants this well extended shut-in status until January 1, 2005.

For reference, Attachment A lists the wells subject to this request. If you have any questions or need additional assistance in regards to the above matters please contact me at (801) 538-5281.

Sincerely,

Dustin Doucet
Petroleum Engineer

Date of Work Completion _____

Report results of Multiple Completions and Recompletions to different reservoirs on WELL COMPLETION OR RECOMPLETION AND LOG form.

* Must be accompanied by a cement verification report.

13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Evergreen Operating Corporation intends on flow testing the Mancos Formation to determine if the well is capable of producing gas in commercial quantities. If it is determined there is commercial production Evergreen plans on building tank/battery facilities and laying pipeline (ROW Grant # UTU-77717) to hook this well up. If the Mancos is non-productive it is our intent to move up hole and test the Castlegate Formation from 4370' - 4382. Again, the same applies to the Castlegate. If productive the well will be hooked up to produce. If not the well will be plugged and abandoned.

If the well is not plugged and abandoned a casing mechanical integrity test will be performed.

14. I hereby certify that the foregoing is true and correct.

OPERATOR CHANGES DOCUMENTATION

Enter date after each listed item is completed

1. (R649-8-10) Sundry or legal documentation was received from the **FORMER** operator on:

10/21/2004

2. (R649-8-10) Sundry or legal documentation was received from the **NEW** operator on:

10/21/2004

3. The new company was checked on the **Department of Commerce, Division of Corporations Database** on:

10/21/2004

4. Is the new operator registered in the State of Utah:

YES Business Number:

5738462-0143

5. If **NO**, the operator was contacted on:

6a. (R649-9-2) Waste Management Plan has been received on:

6b. Inspections of LA PA state/fee well sites complete on:

7. **Federal and Indian Lease Wells:** The BLM and or the BIA has approved the merger, name change, or operator change for all wells listed on Federal or Indian leases on: not yet

8. **Federal and Indian Units:**

The BLM or BIA has approved the successor of unit operator for wells listed on: _____

9. **Federal and Indian Communization Agreements ("CA"):**

The BLM or BIA has approved the operator for all wells listed within a CA on: _____

10. **Underground Injection Control ("UIC")** The Division has approved UIC Form 5, Transfer of Authority to Inject, for the enhanced/secondary recovery unit/project for the water disposal well(s) listed on: N/A

DATA ENTRY:

1. Changes entered in the Oil and Gas Database on: 10/28/2004
2. Changes have been entered on the Monthly Operator Change Spread Sheet on: 10/28/2004
3. Bond information entered in RBDMS on: 10/28/2004
4. Fee/State wells attached to bond in RBDMS on: 10/28/2004
5. Injection Projects to new operator in RBDMS on: 10/28/2004
6. Receipt of Acceptance of Drilling Procedures for APD/New on: ***

FEDERAL WELL(S) BOND VERIFICATION:

1. Federal well(s) covered by Bond Number: 104091293

INDIAN WELL(S) BOND VERIFICATION:

1. Indian well(s) covered by Bond Number: n/a

FEE & STATE WELL(S) BOND VERIFICATION:

1. (R649-3-1) The NEW operator of any fee well(s) listed covered by Bond Number 104319462
2. The FORMER operator has requested a release of liability from their bond on: 10/21/2004
The Division sent response by letter on: 10/28/2004

LEASE INTEREST OWNER NOTIFICATION:

3. (R649-2-10) The FORMER operator of the fee wells has been contacted and informed by a letter from the Division of their responsibility to notify all interest owners of this change on: 11/1/2004

12. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Clearly show all pertinent details including dates, depths, volumes, etc.

Casing leak is estimated to be between 300' - 800' from previous operations. The current plan is to perform remedial cement squeeze operations to repair casing leak and return this well to production. The anticipated timing of this workover is expected to occur in late September, 2005. Regulatory forms will be submitted in the next month. (August, 2005)

This well is currently shut-in due to a suspected casing leak. Casing leak is estimated to be between 300'-800' from previous operations. The current plan is to perform remedial squeeze operations to repair casing leak and return this well to production. The anticipated timing of this workover is expected to be completed, depending on rig availability, in the next 8-12 weeks.

Procedure

1. Record tubing and casing pressures on well prior to blowing down.
2. Set frac tank with clean 2% KCl water
3. Set flowback tank
4. Hold safety meeting with all involved
5. MIRU WO unit and set BOP's, pressure test stack
6. RIH w sandline and swab cups – determine fluid level and record
7. Release AS-1 packer at 2801 ft and POOH combined 5284 ft tbg and packer
8. MIRU wireline with lubricator and set RBP at ~5150 ft – do not set in a casing collar, dump one sack sand on top of RBP
9. Pressure test casing to 500 psi surface with 2% KCl water and record pressure test
10. If casing pressure tests then notify engineer (Mark Gully) and prepare to run tbg and rods to place well on pump
11. If casing does not pressure test then notify engineer (Mark Gully) and prepare to determine location of casing leak per the following steps.
12. MIRU tubing testers and pressure test tubing prior to RIH
13. Pickup 4 ½ inch tension squeeze packer and RIH to ~1000 ft, pressure test casing to 500 psi surface. Move uphole until casing leak (if exists) is determined.
14. Prepare to squeeze by setting squeeze packer at least 100 ft above casing leak. Establish injection.
15. Squeeze casing leak with 10-40 bbls LWL squeeze cement system mixed at ~15.6 ppg using hesitation squeeze technique. Repeat as necessary.
16. After squeeze pressure is reached unset squeeze packer pull 5 stands then reverse tbg clean. WOC for 24 hours.
17. Drill out squeeze and clean out well bore to RBP. Pressure test casing and report results to engineer (Mark Gully).
18. Prepare to run pump, tbg and rods.

12. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Clearly show all pertinent details including dates, depths, volumes, etc.

This well is currently shut-in due to a suspected casing leak. Casing leak is estimated to be between 300'-800' from previous operations. The current plan is to perform remedial squeeze operations to repair casing leak and return this well to production. The anticipated timing of this workover is dependent on rig availability and weather conditions.

Sundry for casing repair has been filed with the state.

Re: Extended Shut-in and Temporarily Abandoned Well Requirements for Wells on Fee or State Leases

Dear Ms. Ziegler:

As of July 2008, Pioneer Natural Resources (Pioneer) has three (3) State Mineral Lease Wells and six (6) Fee Lease Wells (see attachment A) in non-compliance with the requirements for extended shut-in or temporarily abandoned (SI/TA) status. Wells SI/TA beyond twelve (12) consecutive months require the filing of a Sundry Notice in accordance with R649-3-36-1 for Utah Division of Oil, Gas & Mining ("Division") approval. Wells with five (5) years non-activity or non-productivity shall be plugged, unless the Division grants approval for extended shut-in time upon a showing of good cause by the operator (R649-3-36-1.3.3).

Three of these wells have a dated history and a first notice has previously been sent out in regards to their SI/TA status. They are as follows: The State 21-10 well (API# 43-019-31390) - extended SI/TA status was requested by letter dated November 17, 2006. Extension was granted until August 1, 2007. The Division has received no further requests or information on this well. The Main CYN ST 8-2-15-22 well (API# 43-047-31135) - by sundry dated April 10, 2006 Pioneer said it planned to return the well to production. No production reports have been received to date. This well remains SI/TA. The Shimmin Trust 14-12-12-10 well (API# 43-007-30169) - by sundry dated January 25, 2006, Pioneer planned to Plug and Abandon (P&A) this well in early spring of 2006. Approval to P&A this well was given with conditions at that time. This well is still being reported as SI/TA. This is a Second Notice of Non-compliance for these three wells. Please address these matters promptly or a Notice of Violation will be issued. Please submit your plans to produce or plug the other 6 wells referenced in attachment A as well or further actions will be initiated.

For extended SI/TA consideration the operator shall provide the Division with the following:

1. Reasons for SI/TA of the well (R649-3-36-1.1).
2. The length of time the well is expected to be SI/TA (R649-3-36-1.2), and
3. An explanation and supporting data if necessary, for showing the well has integrity, meaning that the casing, cement, equipment condition, static fluid level, pressure, existence or absence of Underground Sources of Drinking Water and other factors do not make the well a risk to public health and safety or the environment (R649-3-36-1.3).

Submitting the information suggested below may help show well integrity and may help qualify your well for extended SI/TA. **Note: As of July 1, 2003, wells in violation of the SI/TA rule R649-3-36 may be subject to full cost bonding (R649-3-1-4.2, 4.3).**

1. Wellbore diagram, and
2. Copy of recent casing pressure test, and
3. Current pressures on the wellbore (tubing pressure, casing pressure, and casing/casing annuli pressure) showing wellbore has integrity, and
4. Fluid level in the wellbore, and
5. An explanation of how the submitted information proves integrity.

If the required information is not received within 30 days of the date of this notice, further actions will be initiated. If you have any questions concerning this matter, please contact me at (801) 538-5281.

Sincerely,

Dustin K. Doucet
Petroleum Engineer

NOTICE OF REPORTING PROBLEMS

Operator: Pioneer Natural Resources Account: N5155 Today's Date: 09/16/2008

Problems:

- ☐ Late Report(s)
☐ Inaccurate Report(s)
☐ Incomplete Report(s)
☒ Other: No Subsequent Report

Failure to submit reports in a timely, accurate, and complete manner may result in the issuance of a Notice of Violation by the Division of Oil, Gas and Mining; and may result in the Division pursuing enforcement action as outlined in Rule R649-10, Administrative Procedures, and Section 40-6-11 of the Utah Code.

To avoid compliance action, these reporting problems should be resolved within 7 days.

Send reports to:

Utah Division of Oil, Gas and Mining
 1594 West North Temple, Suite 1210
 P.O. Box 145801
 Salt Lake City, Utah 84114-5801

Fax to:

(801) 359-3940 **43 047 31135**
Main Cyn St 8-2-15-22

Description of Problem:

Operator has submitted sundry of intents on the following wells that have been approved by DOGM. Per Rule 649-3-23, a subsequent report shall be submitted on Form 9, Sundry Notice, within 30 days after completion. The report should show workover results, well status, work completion date, new perforation depths, etc.

If you have questions or concerns regarding this matter, please contact Rachel Medina at (801) 538-5260.

Subject: Extended Shut-in and Temporary Abandoned Well Requirements for Fee or State Leases dated September 3, 2008.

Dear Ms. Ziegler:

The Division of Oil, Gas and Mining (the Division) is in receipt of your letter dated October 8, 2008 in regards to the nine (9) shut-in or temporarily abandoned (SI/TA) wells (Attachment A) operated by Pioneer Natural Resources.

The Division does not object to the proposed work on the said wells. However, due to insufficient evidence the Division is unable to grant extended SI/TA status for these wells. Not enough data was received per R649-3-36 providing proof of integrity or lengths of time wells are expected to be shut-in. The Divisions preferred method of demonstrating well integrity is to perform an MIT. Please note, approval will be necessary prior to continuing with any planned work for these wells.

Please submit an individual sundry for each well along with required information to help expedite approval and documentation processes. If the required information is not received within 30 days of the date of this notice, further actions may be initiated. Please feel free to contact me at (801) 538-5281 concerning specific requirements to ensure all information is included with sundries.

Sincerely,

Dustin K. Doucet
Petroleum Engineer

12. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Clearly show all pertinent details including dates, depths, volumes, etc.

Pioneer hereby requests an extension to the TA status on the Main Canyon St 8-2-15-22 well. We are currently writing a procedure and securing funding to make the necessary repairs & workover - plans are to start work in 2010.

We propose to run a MIT to prove the well integrity as stated in Rule R649-3-36-1.3. Plans are to run the MIT in late spring early summer 2009 when weather and road conditions allow.

The MIT procedure will be as follows:

- 1) MIRU water truck w/triplex pump
- 2) Install chart recorder on wellhead & second line on annulus
- 3) Load well with formation water
- 4) Pressure up to 1000 psi & SI pump
- 5) Record pressure for 30 minutes
- 6) RD & release pump truck

MIT results will be forwarded to UDOGM via the field

RE: Extended SI and TA Well Requirements for Wells on Fee or State Leases

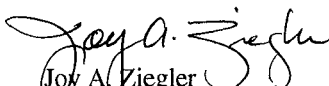

Dear Mr. Doucet,

In response to your letter dated September 3, 2008 and our telephone conversation of October 1, 2008 – Pioneer proposes the following actions:

1. Castlegate St 11-16H: Due to 320 spacing – the well has been SI so the 4-16 well could be produced – The recent hearing on September 24, 2008 reduced spacing to 2 wells per 160 acres in the NW/4 of Sec. 16 – Cause No. 220-08 – Plans are to produce well
2. State 21-10: Well remains SI due to no pipeline
- 3. Main Canyon St 8-2-15-22 – Writing procedure and securing funding to make necessary repairs and workover – will proceed after weather permits in the late spring of 2009.
4. Shimmin Trust 14-12-12-10 – Will P&A in spring of 2009 – when weather permits – Pioneer will place this well on their priority list to be the 1st well plugged
5. Shimmin Trust 3-14-12-10 – Will P&A in spring of 2009 – when weather permits
6. Shimmin Trust 1-12-12-10 – H2S present SI and locked out – Waiting on full development of field to deal with sour gas
7. Jensen 2-10-12-10 – Surface casing set, was not drilled – will add to our 2010 drilling program
8. Jensen 11-14 - Surface casing set, was not drilled – will add to our 2010 drilling program
9. Atchee #4-25-12-25 – Plan to P&A in 2010

If you have any questions, please contact the undersigned at 303-675-2663, Steve Schreck, Engineering Compliance Supervisor at 303-675-2782 or Bob Sencenbaugh, Staff Operations Engineer at 303-675-2650 – or the letterhead address.

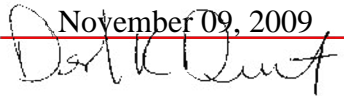

Yours truly,

Joy A. Ziegler
Senior Engineering Tech

The Utah Division of Oil, Gas, and Mining

- State of Utah
- Department of Natural Resources

Electronic Permitting System - Sundry Notices

Sundry Conditions of Approval Well Number 43047311350000

- 1. Notify the Division at least 24 hours prior to conducting abandonment operations. Please call Dan Jarvis at 801-538-5338.**
- 2. Amend Plug #1: A 100' minimum cement plug (± 8 sx) shall be spotted on top of the CIBP @5100', not 2 sx as proposed.**
- 3. Amend Plug #2: Note: casing leaks noted between 387' and 823'. Operator should pressure test casing after setting CICR@2550' and determine if casing has leaks as indicated. If casing leaks are indicated a different procedure may need to be employed. Contact the Division to discuss any issues. Cement does not need to be tagged above this plug. Operator should not leave string in hole below suspected casing leaks while waiting on cement.**
- 4. Add Plug #3: A 100' plug (± 8 sx) shall be balanced from $\pm 1200'$ to 1100'. This will isolate the base of the Moderately Saline Groundwater as required by rule R649-3-24-3.3.**
- 5. All balanced plugs shall be tagged to ensure that they are at the depth specified.**
- 6. All annuli shall be cemented from a minimum depth of 100' to the surface.**
- 7. Surface reclamation shall be done in accordance with R649-3-34 – Well Site Restoration.**
- 8. All requirements in the Oil and Gas Conservation General Rule R649-3-24 shall apply.**
- 9. If there are any changes to the procedure or the wellbore configuration, notify Dustin Doucet at 801-538-5281 (ofc) or 801-733-0983 (home) prior to continuing with the procedure.**
- 10. All other requirements for notice and reporting in the Oil and Gas Conservation General Rules shall apply.**

**Approved by the
Utah Division of
Oil, Gas and Mining**
